- ✓ Rate allows it
- x Rate does not allow it

¹ If there is no availability for the original rate or it does not comply with the conditions for the original rate, it is possible to access a higher rate by paying the difference and the corresponding fee.

For partially used tickets and those that require changes in route, a difference between the rate of the new ticket and that of the originally issued ticket, plus the corresponding fee, shall be charged. Changes are only allowed, when pertinent, during the validity of the ticket. We will assess the difference between the rate paid and the rate that would have corresponded for the flight, plus the fee.

² For partially used tickets to which the Flexible Rate or higher rate applies, the difference between the original ticket rate and the cost that would have been payable for actual travel, minus corresponding fees, will be refunded. The refund is allowed, when pertinent, during the validity of the ticket.
